## Neurologic Relief Centers Technique™

As many as 18 million Americans suffer from fibromyalgia. Tens of millions more suffer from IBS, high blood pressure, Parkinson's disease, multiple sclerosis and numerous other neurologic conditions.

Many are frustrated with traditional treatments, which often has no clear idea of the cause of their condition, and can only treat symptoms, rather than offer a *cure*.

- Severe Pain
- Numbness
- Migraines
- Insomnia
- Fibromyalgia
- Rheumatoid Arthritis
- High Blood Pressure
- Parkinson's Disease
- Multiple Sclerosis
- Trigeminal Neuralgia

“Our Neurologic Relief Center Technique™ is designed to relieve pain and other symptoms naturally, by releasing the meningeal compression.”

A Meninges B Spinal Cord C Nerve Root

### Definitions

**Meninges:** The membranes that surround and protect the brain and spinal cord.

**Neurological:** Deals with the structure and function of the nervous system and the treatment of diseases and disorders that affect it.

The Neurologic Relief Centers team has a different approach, based on the idea that many chronic, debilitating conditions are caused by compression of the meninges — the three-layered membranes that protect the central nervous system. This compression, which may be caused by misalignment or constriction of the channels that carry the spinal cord and major nerve junctions, may cause continual, erratic firing of nerve impulses.

Our Neurologic Relief Center Technique™ is designed to relieve pain and other symptoms naturally, by releasing meningeal compression.

Before treatment begins, the NRCT™ specialist will give you a simple, noninvasive screening test to determine if you are a good candidate for the treatments.

Unlike traditional medical tests, which can be painful or uncomfortable, the NRC test actually brings immediate relief from symptoms for many of our patients.

The relief that comes from this screening test is usually profound and can last from minutes to days.

“Thank you for giving us our daughter Brandy back. . . a young woman came to you with no hope and returned home with her entire life in front of her and she is taking full advantage of her second chance.”

- Blaine and Cindy

“This treatment has given me hope. Hope for improvement and hope that I can lead a normal life. With that hope has come glorious joy!”

- Louise
